DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Hughes (U.S. Patent No. 6,275,223 B1).

As to claim 1, Hughes teaches a method for managing messages, comprising the steps of: displaying a message to a user (col. 3 lines 50-52 and fig. 15); accepting from said user an annotation to said message (figs. 15 and 18); associating said annotation with said message (fig. 18); and thereafter selectively displaying said annotation with said message (fig. 18).

As to claim 2, Hughes teaches the method of claim 1, said selectively displaying step further comprising the steps of

displaying with said message indicia representing the existence of said annotation (annotation data exist, col. 13 lines 52-56);

selectively receiving from said user a request to display said annotation (col. 13 lines 52-56); and

displaying said annotation with said message (fig. 18).

Art Unit: 2174

As to claim 3, Hughes teaches the method of claim 1, said accepting step further comprising the steps of:

selectively presenting to said user an edit panel; and receiving from said user said annotation input to said edit panel (fig. 18).

As to claim 4, Hughes teaches the method of claim 1, further comprising the steps of:
selecting a message from a first file of messages for display to said user; and
associating in a second file said annotation to a corresponding message in said
first file (annotation data and matching the line numbers of the original source code and
the new source code, col. 3 lines 58-67).

As to claim 5, Hughes teaches the method of claim 4, further comprising the steps of:

providing message identifying indicia for each message in said first file;

generating annotation identifying indicia as a function of said message identifying indicia (col. 14 lines 52-57 and fig. 18).

As to claim 6, Hughes teaches the method of claim 4, further comprising the steps of:

upon presenting a message from said first file, determining the presence of a

corresponding annotation in said second file (first and second data entry windows, col. 14

lines 52-55);

responsive to the presence of said corresponding annotation, displaying with said message indicia representing the existence of said annotation (problem or comment, col. 14 lines 56-57);

selectively receiving from said user a request to display said annotation (activating, col. 14 lines 48-49); and

Art Unit: 2174

responsive to receiving the request from said user, displaying said annotation with said message (col. 14 lines 43-57 and figs. 15, 17-18).

As to claim 7, Hughes teaches the method of claim 1, further comprising the steps of:

during processing of application code entered by a user, identifying an error in
said code (col. 6 lines 20-21);

selecting and presenting to said user an error message corresponding to said error (col. 15 lines 8-18);

identifying and presenting to said user an annotation corresponding to said error message (col. 4 lines 1-11); and

enabling and selectively receiving an annotation and a modified annotation from said user for association with said error message (fig. 18).

As to claim 8, Hughes teaches the method of claim 7, further comprising the steps of:

preserving a history of error messages presented to said user (col. 6 lines 22-23);

enabling user selection of an error message from said history of error messages

(col. 13 lines 52-60); and

selectively receiving from said user an annotation to the error message selected from said history (col. 14 lines 22-36).

As to claim 9, Hughes teaches the method of claim 1, further comprising the step of presenting said annotation to other users receiving said message (communicate over the Network, col. 14 lines 22-26).

As to claim 10, Hughes inherently teaches the method of claim 4 further comprising the step of enabling access by other users to said second file because Hughes's workstations are

Art Unit: 2174

communicated over the network (col. 14 lines 20-25), and second code display window 1502 (col. 12 lines 23-37) of fig. 15 can be viewed and controlled throughout the network.

As to claim 11, it is individually similar in scope to claim 1 above; therefore, rejected under similar rationale.

As to claim 12, this is a system claim of method claim 1. Note the rejection of claim 1 above.

As to claim 13, Hughes teaches a system for presenting messages in a user display, comprising:

a first file for storing a plurality of messages, each said message identified by a message key;

a second file for storing a plurality of annotations, each said annotation associated with a corresponding said message (col. 4 lines 27-29, col. 14 lines 1-25 and fig. 16);

a first event driven control component for selecting from said first file a display message from said first file for presentation in said user display (col.14 lines 27-36);

a second event driven control component for determining the presence in said second file of an annotation associated with said display message (col 14 lines 19-21); and

a third event driven control component for displaying said associated annotation in said user display (col. 14 lines 40-57).

As to claim 14, Hughes teaches the system of claim 13, further comprising a fourth control component responsive to entry in said user display of a message annotation to a

Art Unit: 2174

displayed message, for adding said message annotation to said second file associated with said displayed message (edit annotation window, col. 14 lines 52-57).

As to claim 15, Hughes teaches the system of claim 14, further comprising an editor for receiving via an annotation panel in said user display said message annotation (edit annotation window, col. 14 lines 52-57 and fig. 18).

As to claims 16 and 17, these are computer program product claims of claim 1. Note the rejections of claim 1 above.

As to claim 18, this is a computer program product claim of system claim 12. Note the rejection of claim 12 above.

As to claims 19-30, these are computer program product claims of method claims 2-11 and 13-14. Note the rejections of claims 2-11 and 13-14 above respectively.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Eick (U.S. Patent No. 5,644,692) teaches annotation, debug, messages, and user interaction (col. 2-37 and figs. 5-17).

Grief et al. (U.S. Patent No. 5,371,675) teach debugging tools, messages, annotation, and GUI (cols. 1-36 and figs. 2-10).

Hennum et al. (U.S. Patent No. 6,259,445 B1) teach annotation, files, debug, and display (cols. 2-14 and figs. 3-19).

Art Unit: 2174

Hernandez et al. (U.S. Patent No. 4,723,209) teach annotation, objects, editor, and error messages (cols. 2-23 and figs. 1-18).

Leshem et al. (U.S. Patent No. 5,870,559) teach annotation, note, messages, and interactive with code (cols. 1-118 and figs. 1-24).

Ludwig et al. (U.S. Patent No. 5,617,539) teach annotation, editing, messages, and display (cols. 2-41 and figs. 2-41).

Schmitz (U.S. Patent No. 5,128,871) teaches program logic, annotation, debug, and display (cols. 1-67).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Truc T Chuong whose telephone number is 703-305-5753. The examiner can normally be reached on M-F 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on 703-308-0640. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
